

Top line analysis of NDNS Y12 (2019-2020) Consumption chips & fried potatoes

published July 2025

Includes all types of chips and fried potatoes, e.g. French fries, fresh, frozen, oven and microwave. Including homemade, takeaway and restaurant*

Issued on 23/02/2026

[Note: *Please note that for NDNS Y12-15 (2019-2023), the food grouping system was reviewed and a new structure implemented to better align with government public health priorities (<https://app.box.com/s/dufvwm0hzf2qhaoy3nk5flzs9w3wa01n/file/1880692667668>). See <https://app.box.com/s/240olagj9g8d1401uyrfy179vvhjnk3> for category breakdown. Also, from 2019 (Y12), please note that the dietary assessment method was changed from a paper diary to Intake24 (an online tool) completed on 4 non-consecutive days over a 2-week period. Therefore, it is not possible to compare food consumption and nutrient intakes from 2019 to 2023 with those from previous years (<https://www.gov.uk/government/statistics/national-diet-and-nutrition-survey-2019-to-2023/national-diet-and-nutrition-survey-2019-to-2023-report>). Finally, for Y12, please note that fieldwork and data collection was suspended between March and October 2020 due to the COVID-19 pandemic, resulting in reduced response rates from October 2019-March 2020. The pandemic, along with rising inflation, have had an impact on availability and price, and consequently lifestyle and eating behaviours (<https://app.box.com/s/6hbjj2fi2fyyxh6weu1lgib5p1p4mfsp>)]

Data from NDNS Rolling Programme Years 8 - 12
Chips & fried potatoes
% Consumption by Age Group
